Turning Air Into Hot Water Here's How It **Works**

1 Air Intake
The fan pulls in air from around your home.

2 Heat Extraction
Inside the system, the evaporator absorbs heat from the air using a special refrigerant, even on cold days.

3 Heat Amplification
The compressor boosts this heat to a higher temperature.

4 Water Heating
The heat transfers to the water stored in the tank, making it piping hot.

5 Ready on Demand
Hot water is stored, ready to flow to your taps or shower whenever you need it.

Performance at a Glance

Model	HP200	HP270
Tank Water Capacity	200 Litres	270 Litres
Heating Capacity kW	2.78kW	2.78kW
COP	4.15	4.15
Refrigerant	R290 (400g)	R290 (400g)
Temperature Range	-15 °C TO 43 °C	-15 °C TO 43 °C
Noise dB	43	43

Sizing Chart	
1-3 peoples	For 1–3 people, the 200L model is your ideal match. It delivers consistent hot water without waste, perfect for smaller families.
4-5 peoples	For 4–5 people, the 270L model is built to handle higher demand, ensuring plenty of hot water for showers, dishes, and laundry.

How ætherSmart Simplifies Your Experience?

Detect. Diagnose. Resolve. ætherSmart Fixes It Fast.

ætherSmart monitors your system 24/7 and alerts you, your installer and our Australian team the moment an issue arises.

Your local ætherPro Installer & æther Support Team diagnose issues remotely—often fixing them without a service call.

Local ætherPro Installer or service agent arrives with the right fix, minimizing downtime and hassle.

Why wait days for a technician when ætherSmart can detect and diagnose in seconds?

Peace of Mind, Every Step of the Way

We make hot water simple, smart, and stress-free—from day one

1 Your journey begins with æther, an **Australian-owned** manufacturer **approved for all rebates** nationwide..

2 Connect with a **local ætherPro Certified Installer**—trained and certified to install and support æther heat pumps.

3 Enjoy expert installation knowing your system is backed by a **5-Year Australian Comprehensive Warranty** for total peace of mind.

4 Set up a **smart timer** to heat water using solar or during off-peak hours for maximum efficiency..

5 Need extra hot water? Activate the **Boost mode** to meet high-demand days effortlessly.

6 Relax & Enjoy your Hot Water with absolute confidence with your **ætherSmart App** & **Australian Customer Service**

æther – The Pillars of Our Brand

Designed for Australian homes. Built for performance. Backed by technology. Experience smarter hot water with æther.

A Australian-Owned & Operated	Proudly Australian, designed for Australian homes, and built to perform in extreme conditions
E Expert Installers & Support	Trained & certified ætherPro installers and Australian-based support ensure professional service and fast resolutions
T Technology-Driven & Future-Ready	Advanced ætherSmart technology offers real-time monitoring, proactive diagnostics, and remote issue resolution.
H High-Efficiency & Cost-Saving	Efficient hot water units reduce energy consumption, lower running costs, and minimize environmental impact.
E End-to-End Reliability	With proactive fault detection, seamless smart connectivity, and minimal downtime, your hot water is always running smoothly.
R Rock-Solid Warranty	Comprehensive 5-year warranty on parts & labor ensures peace of mind and long-term performance

Our products have been certified to meet all the Australian Standards.
